SKILLS AND ABILITIES

Front-end Development

- Core Technologies: **HTML5, CSS3, JavaScript (ES6+), TypeScript**
- Frameworks & Libraries: **React, Next.js**
- State Management: **Redux, Redux Toolkit**
- UI & Styling: **Tailwind CSS, SCSS**
- Performance Optimization: **SSR, SSG, SEO best practices**

Back-end Development

- Technologies: **Node.js, Express**
- Databases: **MongoDB**
- APIs: **REST, GraphQL**
- Headless CMS: **Strapi**
- Auth & Security: **JWT, NextAuth.js**

Soft Skills

- Problem Solving: **Identify issues and implement solutions**
- Debugging & Troubleshooting: **Analyze errors and ensure functionality**
- Code Review & Collaboration: **Review code, give feedback, work in teams**

Learning & Growth

- Continuously learning TypeScript, Next.js advanced features
- Exploring backend with Node.js & GraphQL
- Improving performance optimization techniques

EDUCATION

Adams Digital Agency - Full Stack Developer   (Baku) 2024 - 2025
- Gains experience with Next.js, Node.js, Express, and MongoDB through guided projects
- Learned to build and integrate REST and GraphQL API.
- Implemented authentication with JWT and NextAuth.js, and managed content using Strapi.
- Collaborated with mentors to enhance coding skills and understanding full stack development workflow.
- Practiced applying responsive design and optimizing UI/UX for web applications.

IT Innovation Academy - Front-end Developer   (Baku) 2023 - 2024
- Learned fundamental web development technologies including HTML, CSS, JavaScript, and React
- Built React projects applying core concepts and responsive design
- Practiced component-based architecture, state management, and modern UI/UX best practices.
- Worked on real projects under the mentorship of Vagif, strengthening problem-solving and coding skills.

Projects / Experience

Bakcell Demo - Live Demo | GitHub
- Built a responsive **Next.js** application simulating a mobile operator's website.
- Developed modular components with enhanced UI using **React Icons** and **Swiper**.
- Applied **Tailwind CSS** for modern, mobile-friendly design and cross-device compatibility.

Codevolution - Live Demo | GitHub
- Built a responsive **React** application with **Tailwind CSS** for modern, mobile-friendly design.
- Implemented multilingual support using **i18next**, react-i18next**,** and **i18next-browser-languagedetector**.
- Structured modular components with **ReactDOM** for maintainable and reusable code.

Addax - Live Demo | GitHub
- Developed a responsive **React** application with **SASS** for modern, mobile-friendly design.
- Integrated **EmailJS** for seamless email communication within the application.
- Enhanced UI with **React Icons** and smooth scrolling functionality using React Scroll.

Ultel - Live Demo | GitHub
- Developed a responsive **Next.js** application simulating a telecommunications company's website.
- Designed a modern, mobile-friendly interface using **Tailwind CSS**.

Turbo-car - Live Demo | GitHub
- Built a **Next.js** application with **Tailwind CSS** for modern, **responsive design**.
- Enabled users to register, create profiles, and add products using **React Hook Form**.
- Implemented product approval workflow: products are visible to others only after admin approval.
- Integrated **Supabase** for **backend**, **SSR**, and database operations; used **date-fns** for date handling.
- Enhanced UI with **React Icons** for better user experience.
